DAY USE LOCKERS

MATERIAL CHOICES

Designing a facility and choosing the right materials is never an easy process. There are many factors to consider, and this is especially important when it comes to choosing your facility’s lockers. Choosing the wrong material can lead to maintenance issues, reduced storage capacity, and unnecessary waste in the landfill when lockers are retired or spaces are reconfigured.

Spacesaver’s steel-frame lockers bring a unique blend of quality, durability and aesthetics to offices, libraries, fitness centers, and any other space where personal belongings need to be stored. Our Day Use Lockers optimize form and function, providing secure storage for personal items inside a customizable design. Modular sizes and a variety of finishes and locking options help ensure a perfect fit for any space.

FRAME: STEEL VS. ALL-LAMINATE: WHICH IS BEST?

Welded steel frames offer enduring quality and style, and its steel’s long life cycle makes it one of the most sustainable materials available.

	STEEL	LAMINATE
