DAY USE LOCKERS

DAY USE LOCKERS BY SPACESAVER

UNLOCK THE POTENTIAL

By wrapping a durable steel locker frame with full overlay doors, Spacesaver's Day Use Lockers bring a unique blend of quality and aesthetics to offices, libraries, spas, and other interior environments. The lockers optimize form and function, providing secure storage for personal items inside a customizable and reconfigurable design. Modular sizes and a variety of finishes and locking options ensure a perfect fit for any space.

BENEFITS

Spacesaver Day Use Lockers combine the durability of welded steel frames with the aesthetics of full overlay doors.

QUALITY

- Heavy-duty steel frame
- Engineered and tested to ensure reliability and durability
- Made in the USA
- Five-year warranty*

AESTHETICS

- Custom sizes, colors, and configurations
- Full overlay steel, laminate, and wood** door options
- Euro-style concealed hinges
- Sleek, seamless construction

CONVENIENCE

- Easy to use, clean, and maintain
- Lock and technology options for any need
- Modular, reconfigurable, and expandable
- Integrates with Spacesaver shelving and other storage solutions
- Available for purchase on contract

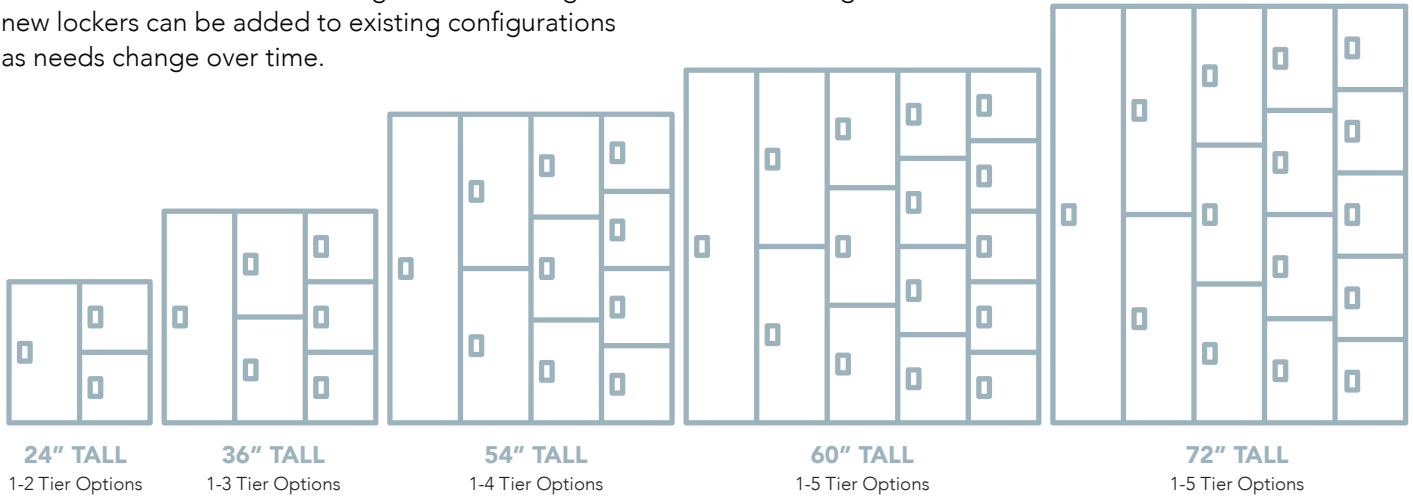

* Five-year warranty on lockers; locks are covered by their respective manufacturers

** Wood doors and / or surrounds are custom orders

DAY USE LOCKER CONFIGURATIONS

Spacesaver Day Use Lockers come in a full range of modular sizes to suit any space, giving you the perfect storage solution for any application. Popular configurations include islands, which provide seating or a work surface; partitions, which divide a room; or built-ins, which convert underutilized space in walls or under desks into useful storage. Locker arrangements can be reconfigured and new lockers can be added to existing configurations as needs change over time.

LOCKER HEIGHT	OPENING HEIGHT	OPENING WIDTH	OPENING DEPTH
24"	12", 24"	12", 15", 18"	12", 15", 18", 24"
36"	12", 18", 36"	12", 15", 18"	12", 15", 18", 24"
54"	13.5", 18", 27", 54"	12", 15", 18"	12", 15", 18", 24"
60"	12", 15", 20", 30", 60"	12", 15", 18"	12", 15", 18", 24"
72"	14.4", 18", 24", 36", 72"	12", 15", 18"	12", 15", 18", 24"

Day Use Locker frames¹ are built to your needs from the start. Our lockers are available in a full range of dimensions: with standard heights at 24, 36, 54, 60, and 72 inches, depths at 12, 15, 18, and 24 inches, and widths at 12, 15, and 18 inches.

* Additional sizes available in 1" increments upon request.

STANDARD FEATURES

Full overlay double-wall steel doors are available in a broad range of standard and custom powder-coat finishes.

STEEL FRAME¹

Steel frame features high-quality construction with no exposed fasteners for easy cleaning and safety.

HIGH-QUALITY HINGES

Rated and tested to ensure their durability. Hidden stainless steel slam-proof hinges with adjustable closing rate.

LEVELING BASE⁴

4" high recessed or flush base with levelers for simple leveling adjustment.

DOOR OPTIONS

STANDARD OFFERING

STEEL²

Full overlay door available in a steel double-wall finish. Available in a broad range of standard and custom powder coat finishes.

LAMINATE³

Full overlay door available in HPL finishes. Available in any Wilsonart HPL offering with matching 3mm PVC edge banding options.

PERFORATED STEEL

Full overlay door available in steel double-wall finish to prevent dust and clutter and encourage ventilation.

WOOD

Full overlay door available to create a warm, high-end look.

LOCK OPTIONS

RIFD

Swipe badge, ID, or wristband to open locker

KEYPAD

Lock operates using an alphanumeric keypad or key slot via ADA compliant user key

MECHANICAL

Lock operates using a combination chosen by each user and resetting after each use

HASP

Allows use of any lock to secure locker contents while in use, or remain accessible when vacated

KEYED

Individual key operates lock, with master key available

OPTIONAL ACCESSORIES

SLOPED TOPS

Prevent dust and clutter from accumulating on top of lockers.

NUMBER TAGS

Adhesive tags identify individual lockers.

REAR VENT

Promote air circulation.

INTERIOR HOOK

Keep personal belongings organized and accessible.

TECHNICAL SPECIFICATIONS

¹ LOCKER FRAME

The day use locker frame is constructed of 18 gauge (.048") steel top, bottom and sides joined using resistance welding. The locker frame can be divided into multiple tiers through the use of a fixed position shelf or shelves. Shelves are mechanically fastened to the locker interior using a locking lance feature. Locker can be single, double, or triple column to increase the number of openings in a frame.

² STEEL DOORS

The steel locker doors are formed from two pieces of 20 gauge steel, box formed and riveted together. Doors are full overlay style and ¾" thick. Doors use one-piece wraparound hinge, constructed of steel and nickel-plated to open 110 degrees. The number of hinges used is dependent on the door height – 12" to 27" high doors use two hinges, 28" to 55" high doors use three hinges, and doors 56" to 72" use four hinges. Available in a broad range of standard and custom powder coat finishes.

³ HPL LAMINATE DOORS

The High Pressure Laminate (HPL) doors are ¾" thick MDF with Wilsonart selected design on both face and 3mm color-matched PVC edge banding. Doors are full overlay style. Doors use one-piece wraparound hinge, constructed of steel and nickel-plated to open 110 degrees. The number of hinges used is dependent on the door height – 12" to 27" high doors use two hinges, 28" to 55" high doors use three hinges, and doors 56" to 72" use four hinges.

⁴ LEVELING BASE

The bases are constructed of 18 gauge (.048") steel. Base includes threaded appliance levelers in all 4 corners. Bases are 4" tall and can be flush to the frame or recessed 1" from the frame to create a toe kick.

Specifications subject to change.
