

INFO SHEET

VIKING PRESERVATION CABINET: 920 SERIES VERSATILITY BUILT IN.

The biggest challenge in planning a collections area is dealing with future uncertainty: How will collections grow over time? Could collecting priorities shift in a few years? Will that long-planned expansion ever get the green light?

Although it's still important to make well-informed estimates, the Spacesaver Viking Preservation Cabinet 920 Series allows for complete flexibility as time goes by. With a reconfigurable interior and a sturdy, modular frame, the Spacesaver 920 Series offers a unique combination of versatility and strength.

RECONFIGURE AS YOUR NEEDS CHANGE

Fill it with trays today, and years down the road, after collections have grown or changed, the cabinet interiors can be reconfigured with drawers, hanging rods, or other accessories.

IT'S MORE THAN A CABINET. IT'S A COMMITMENT.

A cabinet represents a significant investment, not only on your part, but also on ours. Made in the USA of heavy-duty steel, the Spacesaver 920 Series offers complete flexibility and proven performance in even the most extreme conditions. We design and manufacture our full line of museum products under one roof to ensure seamless customer service and coordination with tradespeople and other vendors. And when you need assistance with project planning, product installation, and maintenance and service, our in-house experts work closely with your local distributor to ensure your satisfaction.

A FLEXIBLE FUTURE: BUILDING YOUR CABINETS

Design your cabinets to optimize space, provide room to grow, and promote efficiency throughout the collections area—now and in the future. Interchangeable cabinet liners allow for complete flexibility and the right accessories for your collection.
